Bonded Abrasives

CUTTING DISC

Supercut Cutting Disc is reinforced to provide premium performance in all cut off application. It gives maximum utility and cut capacity on standard portable machines.

FLEXIBLE GRINDING DISC (2MM)

Supercut Flexible Grinding Disc are one of the industry's advance line of performance. It's aggressivity and durability are the main features specially designed for removing materials rapidly and efficiently. It is best used in stainless steel and aluminium.

GRINDING DISC (6MM)

Supercut Grinding Discs are manufactured and tested in order to guarantee the maximum safety for the operator. It offers longer life and excellent stock removal.

MOUNTED POINTS

Supercut Mounted Points have high efficient removable rate. It is durable yet aggressive. It is best used in mild steel, cast iron, non-ferrous metal.

Coated Abrasives

Belts

MIRKA HIOLIT X

Hiolit X is a stiffer product than Hiolit F and Hiolit J and is recommended for belt sanding and other machine sanding. the grits 36 - 80 are suitable for aggressive sanding, e.g., severe rust damage, and other sanding operations where large amounts of materials have to be removed.

MIRKA JEPUFLEX PLUS

The high-class abrasive, Jepuflex Plus, has a wide application area. The focus of the optimization work has been aggressive sanding of hard wood such as beech, birch and oak and sanding of plywood. Jepuflex runs smoothly, has a strong bonding and is resistant to humidity.

Discs

MIRKA ABRALON

Abralon® is a unique multi-functional patented sanding material developed for the flexible sanding of both smooth and profiled surfaces.

Abralon® creates a smooth sanding pattern on angled surfaces and edges, while minimising the risk of pressure marks. Abralon® is especially suitable for use in the automotive and marine industries. The flexible weave allows water and air to pass freely, making the product suitable for both dry and wet sanding, either by machine or hand. Abralon® is also suitable for the finishing and pre-polishing of gelcoat, sheet moulding, compound (SMC), glass reinforced plastic (GRP), lacquers, etc.

MIRKA ABRANET

Abranet® is a revolutionary sanding material for dust-free sanding.

This unique patented material contains thousands of small holes, making it possible to effectively vacuum dust and other particles away without clogging the disc surface. Since the amount of airborne dust has been minimised, the work environment is remarkably improved.

Abranet® has been developed for sanding purity, primers, lacquers, composite minerals and a large amount of other minerals. This is durable long-lasting sanding material.

MIRKA COARSE CUT

Coarse Cut is an aggressive sanding material suitable for sanding lacquer and putty, glass reinforced polyester and welding seams. Coarse Cut is a durable product suitable for all kinds of coarse sanding. This is due to the specially reinforced backing material and Progressive Bond™ dust binding technology developed by Mirka.

MIRKA GOLD

Gold is a durable product very well suited for sanding high speed. Gold is an all round sanding material that can be used for many purposes. In order to achieve an optimal sanding result, the semi open coating and special stearate coating are designed to prevent clogging and pill forming.

MIRKA JEPUFLEX PLUS

It is a high class abrasive with good stock removing qualities. Its works well on Metal, wood and plastics. The focus of the optimization work has been the aggressive sanding of hard wood such as beech, birch and oak and sanding of plywood. Jepuflex runs smoothly has a strong bonding and is resistant to humidity.

Discs

MIRKA POLARSTAR

Polarstar has been developed to efficiently tackle the latest demanding coatings applications. The polyester film backing material creates a more flexible and much smoother abrasive surface, compared to paper backing. Polarstar produces a fine, consistent surface finish quickly and lasts long because of excellent resistance to clogging.

MIRKA Q-SILVER

Q-Silver is an abrasive with optimal aggressivity to achieve fast and Efficient stock removal. This product possess high heat endurance and is tough in down-to-metal sanding operations, for example in automotive lacquer sanding. The performance in sanding of hard wood and composites is also extremely good. The backing consists of a flexible and strong impregnated latex paper.

MIRKA ROYAL MICRO

Royal Micro is an excellent product for fine sanding sensitive surface and for repairing paint damage. Royal Micro works especially well on soft and fresh paints due to a special stearate coating that prevents clogging and pill formations. The Royal micro products are the fine grits within the Royal product range.

MIRKA ROYAL PLUS

Royal plus is a flexible and durable product that provides high-quality sanding result. Royal Plus has a definite place within the wood and automotive industries and is suitable for sanding composite materials.

Coated Abrasives

Rolls

MIRKA HIOLIT X

Hiolit X is a stiffer product and it is recommended for belt sanding and other machine sanding. It is meant for aggressive sanding; It is durable and has super edge wear resistance.

ABRASIVES CATEGORY

MIRKA JEPUFLEX PLUS

Jepuflex Plus is a high class paper abrasive product. It has the aggressiveness of sanding hard wood and has a strong bonding, and is also resistant to humidity. It works well on metal, plastic and lacquer. It is an extremely durable product.

Coated Abrasives

Sheets

MIRKA CARAT

Carat is a dry sanding product meant for wood, sealers, paint and Lacquers. The backing consists of a flexible, impregnated latex paper which is ideal for profile sanding. The grain adherence is also extremely good.

MIRKA ECOWET

Ecowet is ideal for manual wet sanding of lacquered surfaces between coats as well as for fixing defects in the lacquer. Ecowet is also suitable for removal of orange peel structure and for spot mark repair. The use of a sanding block is recommended, in order to obtain a smooth surface with a smooth sanding pattern.

MIRKA GOLDFLEX

Goldflex is suitable for sanding profile surfaces. It is light, flexible latex paper suited for both dry and wet sanding. The special stearate coating prevents clogging and pill forming.

Non-Woven Products

Belts

SURFACE CONDITIONING BELT

Supercut Surface Conditioning Belts is made from heavy duty materials which provide fast and heavy cutting performance and can help operators avoid one or more abrasive operations. It can be custom made to any sizes at the customer's request.

ABRASIVES CATEGORY

Non-Woven Products

Rolls

NON WOVEN ROLL

Supercut Non Woven Rolls are design for a broad range of jobs including polishing, blending, deburring, rust removing, scuffing and light duty cleaning. Because of their gentle action, they can easily remove burrs without affecting the dimension of the work piece.

Non-Woven Products

Wheels

DEBURRING WHEEL

Supercut Deburring Wheels, as the name suggest, is meant for deburring. It is built to last and resist snagging. It also gives off very little dust during use and creates no chunking.

NON WOVEN WHEEL

Supercut Non Woven Wheel is a versatile product made from a non woven synthetic fiber mesh which is impregnated with abrasives and bound with resin. It's open mesh construction is waterproof, washable and conformable, design for use where stock removal is not required.

Other Abrasives

CATRIDGE ROLLS

Supercut Cartridge Rolls are effective for polishing or removing machine tool marks and edge breaking. It can reach into corners whereby other larger diameter tools cannot.

FIBRE DISC

Supercut Fibre Discs are tough and aggressive. It is manufactured to minimise loading and improve finishing of the substrate. It is use for deburring, removing welding seams, rust, paint and oxidation of any kind.

ABRASIVES CATEGORY

FLAP DISC

Supercut Flap discs are the best choice when you need an abrasive that is durable and fast cutting, even when used for heavy grinding and deburring. The backing does not damage or foul the surface in case of accidental contact. It provides good strength while maintaining a satisfactory degree of flexibility. There are 2 types of Abrasives used in manufacturing the flap disc, namely Aluminium Oxide and Zirconia. Both have their advantages on different surfaces.

FLAP WHEEL

Supercut Flap Wheel has proven itself to be durable and aggressive product. It is use for polishing – grinding jobs as well as clean up and maintenance jobs. It works well on stainless steel, alloy steel, Aluminium, and non-ferrous metals.

LOCKIT DISCS

Supercut Lockit Disc is laminated to a tough backing for exceptional durability. It is ideal for face application in small areas and spaces. The mechanical securing system allows the disc to be firmly held to the pad.

MOP WHEEL

Supercut shaft- Mop Wheels ensure consistent abrasive wear and continuous exposure of new grit while maintaining high cutting performance throughout the entire life of the wheel. It can be used on most metal materials.

SPIRAL BANDS

Supercut Spiral Bands compact design allows you to work even on very confined spaces. It is the best product for polishing and blending contours when smooth running is a primary concern.

Personal Protection Equipment

Gloves

BAND GLOVES

Dress Gloves are especially popular with men as users' and band gloves. They are usually white in colour.

COTTON GLOVES

Our Cotton Gloves are knitted with one of best materials, providing customers with comfort and flexibility. This general purpose glove serves basic needs for hand protection. There are a few thickness available.

HOUSEHOLD RUBBER GLOVES

Household Rubber Gloves are meant for washing with detergents and basic solvents. It provides good grip as well. Ideal for household application.

INDUSTRIAL RUBBER GLOVES

Industrial Rubber Gloves serve as a economic chemical gloves which resistance to chemical is not a major concern. Light application is recommended.

JEANS WORKING GLOVES

Flexor Jeans Working Gloves are made from one of the best leather, giving the user comfort and flexibility while using it. They have a safty cuff, a sturdy palm and finger tips. It is widely use in factories.

NEOPRENE GLOVES

Neoprene Gloves are excellent chemical gloves for protecting hands from exposure to most acids, oil and caustics. It is usually black in colour. Users are recommended to wear them in most acidic applications.

NITRILE GLOVES

Nitrile Gloves are best use to resist solvent, abrasion and perforation. These gloves are flexible and offers a non slip grip.

PE DISPOSABLE GLOVES

P.E. Gloves are low cost gloves which provide basic protection from dirt and impurities. It contains no natural rubber latex.

POKKA DOT GLOVES

Pokka Dot Gloves give user a better grip when holding on to anything. Rubber dots are spreaded on the palm. This light weight gloves serve the basic needs of gripping slippery materials.

RUBBER PALM GLOVES

Rubber Palm Gloves provide the best grip in all aspect. Users are ensured that holding a slippery product is no longer a difficult task. This glove is a durable and yet soft for comfort. It also prevent user from cuts. It is best use to carry glass.

VINYL GLOVES

Vinyl Gloves are tough enough to be reuse and inexpensive to throw away. It offers excellent sensitivity as it is thin and soft. It is latex free.

WELDING GLOVES

Flexor Welding Gloves are resistant to heat, sparks, slags and cut. The leather used is soft so as to provide comfort for the user. All seams are double lock stitched to ensure durability.

Personal Protection Equipment

Masks / Respirators

DRAGER FULL FACE MASK

Drager Full Face Mask have become the known standard for quality, reliability and comfort. It is robust and easy to service. It comes with a full line of accessories to suit every needs. Drager Full Face Mask provides the right solution for environments in which respiratory protection coupled with eye protection ia required.

DRAGER HALF FACE RESPIRATOR ACCESSORIES

Drager Half Mask Accessories are inexpensive, practical and user friendly. It consist of a wide selection of filters to suits every industrial needs. Most accessories are compatible with Drager X-Plore Full Face Mask.

DRAGER HALF MASK RESPIRATOR

Drager Respirator 3300 complete set is developed in close cooperation with industrial users worldwide. It sets new benchmark in comfort and handling. The swept-back position of the filters guarantees a wide field of vision free from obstruction. It is a low maintenance half mask and the right choice for all those who requires inexpensive and comfortable respiratory protection.

DRAGER N95 CHARCOAL MASK

Drager N95 Charcoal Mask has an added carbon layer which helps to filter out nuisance level of organic vapors. It is widely use in Welding application.

PPE CATEGORY

DRAGER N95 MASK

Drager N95 Mask sets new standard in comfort level for filtering facepiece respirator. It is use for protection against solid and liquid particles. The ergonomic shape and the comfort nose pad ensure a secure seal for various facial shapes. The multi-layer high performance filter material offers a superior level of filtration efficiency.

DRAGER N95 MASK WITH VALVE

Drager N95 Mask With Valve reduces breathing resistance and heat that build up inside the mask. This mask shares the same advantages as the Deager N95 Mask.

FLEXOR DISPOSABLE MASK

Flexor Disposable Mask serve the basic needs for dust filtration. The thin material used made breathing easier. It is lightweight and inexpensive. Widely use in all light industry.

FLEXOR N95 MASK

Flexor N95 is a economical facepiece. It's contour surface fits any user comfortably. It is widely use in shipyards and fabrication departments.

SURGICAL MASK 2 PLY

Surgical Mask 2 Ply is a comfortable ear-loop mask, giving the user basic need for breathing protection. It is an alternative to cup masks.

SURGICAL MASK 3 PLY

Surgical Mask 3 Ply is meant to be a more durable ear-loop mask than the 2 ply. It gives user a more secure filtration against dust and liquified vapour.

Personal Protection Equipment

Safety Eyewear

GENERAL PURPOSE GOGGLES

GP Goggles provide basic protection to the eyes. It is light weight with integrate side shield. The end of the frame is also adjustable.

OVERSPEC GOGGLES

Flexor Overspec Goggles are made to be worn over spectacles. Users need not remove their exisiting eyewear when wearing it. This safety goggles is big enough to fit over a eyeglasses. The goggles offers side protection too.

RUBBER GOGGLES

Rubber Goggles are worn to protect against flying chips and debris when sanding. It has anti-fog properties to ensure clear view to user.

AUTOMOTIVE POLISHING COMPOUND

POLARSHINE A12

Polarshine A12 is used for easy and quick polishing, to permanently remove sanding marks, to compound swirl marks and to rapidly give a high gloss finish. It is designed to keep the surface temperature low when polishing. For removal of sanding marks Polarshine A12 is used on wool pads after sanding with P1200, on foam pads after sanding with P1500. Suitable for most paints and coatings. Silicone free.

POLARSHINE C20

Polarshine is a coarse polishing compound for removal of sanding scratches from P1200 and finer, for oxidized surfaces and for wash mark removal. It is also suitable for removal and leveling of fine orange peel structure. It is silicon free.

POLARSHINE F05

Polarshine F05 is a second step polishing compound to be used after Polarshine C20. F05 leaves a high gloss finish without swirl marks. It will remove compound swirls and fine sanding marks. F05 is a medium fine polish for cleaning and refreshing matt surfaces. It is silicon free.

POLARSHINE LWAX

Polarshine Lwax is a liquid wax designed for quick and easy sealing of polished surfaces. It provides a high gloss finish and protect the surface.

POLARSHINE M25

Cloth Buff

Polarshine M25 is a coarse compound for polishing of gel coat. It is suitable for polishing and removal of sanding marks from P800 and finer after sanding with Mirka's unique products Abranet, Abranet Soft, Royal Micro, Q. Silver Micro, Abralon and Waterproof. It is good for removal of sanding marks from P800 and finer.

POLARSHINE T10

Polarshine T10 is the ultimate single compound system. It is a medium coarse polishing compound especially designed for achieving the best result after sanding with Mirka's unique products. T10 removes sanding marks permanently after sanding with Abranet Soft P1500 and P2500 (alternatively Q.Silver, Royal Micro, Waterproof P1500 and finer). To speed up the polishing process after sanding with P1500, continue with Abralon P2000 and / or P4000 before polishing.

POLARSHINE UF3

Polarshine UF3 is an ultra fine polishing compound suitable for protecting the achieved high gloss finish on both original paintwork and repainted surfaces. UF3 is good for buffing and sealing of surfaces, for hologram removal. It is ideal for demanding colors and leaves a long lasting high gloss shine. It contains caruba wax.

EXTERIOR PAINT

ROOFGUARD

Nippon RoofGuard is a high quality and highly durable acrylic-based emulsion that imparts a smooth finish to roof tiles. It contains excellent light-fast and alkali-resistant pigments, and an effective mould-control additive to protect roof tiles. Nippon RoofGuard can be used on old and new unglazed roof tiles, cement-fibre sheets, concrete- or cement-fibre pipes.

SOLAREFLECT

SolaReflect is a high quality stretchable exterior wall paint that reduces heat build up by reflecting infra red light from the coated surface. A better paint for cooler homes. It can reduce surface temperature up to 5 degree Celsius, SolaReflect allows more infrared heat to be reflected away and less getting into your home.

WEATHERBOND

Specially formulated to protect your home against the elements, this durable exterior wall paint gives your exterior walls a tough yet lustrous finish. With strong resistance to dirt, algae and fungus, Weatherbond exterior wall paint also guards against fading and chalking, keeping facades looking new for longer.

INTERIOR PAINT

3-IN-1 MEDIFRESH

Nippon Paint 3-in-1 Medifresh anti-bacterial paint has a special anti-bacterial formula, which offers protection from harmful bacteria such as MRSA, E-Coli and Staphylococcus Aureus. It is a long-lasting coat that promotes better hygiene and health, while keeping the surroundings clean and fresh.

EASYWASH WITH TEFLON

Premium washable paint cleans off stains easily

ODOUR-LESS PAINT

Odour-less paint.

SMARTWHITE

Nippon Paint SmartWhite is the effortless route to a perfect white ceiling. The unique paint ensures you achieve a no-miss result with its breakthrough in paint technology that applies pink and dries white. Your ceilings will have an elegant super flat white finish. The paint has low light reflectance for minimal appearance of imperfections on the surface, and has minimal splatter - giving you an easy, convenient and pleasant painting experience.

VINILEX 5000

Decorate and protect your interior wall surfaces with Nippon Paint Vinilex 5000 Low Odour. A premium grade low odour emulsion paint, it delivers a beautiful smooth matt finish, in a choice of over 1000 colours. Designed to last and give good coverage, there's no better basic paint for your walls.

VINYL SILK

Beautify your home with Nippon Paint Vinyl Silk luxury wall finish, adding sheer elegance to any environment with its soft, silky smooth finish. And with its excellent adhesion and resistance to algae and fungus, Vinyl Silk isn't just about good looks - it's practical too. All of which makes it the definitive choice for a long lasting, luxurious sheen coating. Add a splash of silken sophistication to your life.

PAINTING TOOLS

PRIMERS, SEALERS AND UNDERCOATS

AQUA PRIMER SEALER UNDERCOAT

Nippon Aqua Primer Sealer Undercoat is a water based one step pre-coat formulated with special acrylic polymer for the following excellent properties:

- Alkali and efflorescence resistance
- For interior and exterior application on masonry substrates, timber and metal surfaces.
- Quick drying

PAINTS CATEGORY

BODELAC UNDERCOAT 9000

Nippon Bodelac Undercoat 9000 is a high opacity and high solid undercoat that will effectively hide the substrate and impart a good film build to the overall coating system. Widely used as an undercoat over timber and metal.

VINILEX 5101 WALL SEALER

Nippon Vinilex 5101 Water-Based Wall Sealer is suitable for masonry surfaces. It is formulated to prevent deterioration of emulsion paints by alkalinity of surfaces. This wall sealer is recommended for use in both interior and exterior plastered walls, ceilings, plaster, brickwork and wall boards. Based on specially formulated acrylic it is designed to provide maximum protection against alkali and moisture, enhancing the performance of top coat.

VINILEX 5170 WALL SEALER

Nippon Vinilex 5170 Oil-Based Wall Sealer contains a superior resin/binder, effective in preventing the degradation of finishing coats by alkaline surfaces. This wall sealer contains a blend of solvents that enables it to penetrate deeply and gives a firm base for subsequent coats.

PYLOX SPRAY PAINT

WOOD AND METAL PAINT

AQUA BODELAC

Nippon Paint Aqua Bodelac is a water-based modified acrylic gloss enamel paint with low Volatile Organic Content (VOC). This new breakthrough in water-based paint technology is an eco-friendly, non-toxic alternative to conventional solvent-based alkyd paint. Aqua Bodelac is ideal for interior wood and metal surfaces such as doors and window frames. It can also be used with Aqua Primer Sealer Undercoat for trim works in various substrates like masonry, primed timber and metal. Easy to apply, quick drying, and easy wash-up with water, Aqua Bodelac is the excellent choice for a hassle-free paint job.

PAINTS CATEGORY

BODELAC 9000

Let it shine with Nippon Paint Bodelac 9000, the super gloss paint with a bright, tough finish. With its striking, intense colours, this brilliant super gloss enamel paint makes it easy to give metals a warm glow, or wood a cool, glossy finish. Providing excellent coverage and fungus resistance, Bodelac 9000 is perfect for use on primed wood and metal surfaces, both internally and externally.

SOLARSHIELD

Nippon SolarShield is a durable pigmented wood varnish that provides long-lasting protection against cracking, flaking and peeling. It contains a special resin to create a water-resistant and flexible finish that highlights the natural beauty of the wood grain and filters out UV rays. Nippon SolarShield is suitable to be used on all types of new and previously painted wood surfaces.

WOOD PAINT

TIMBERCOAT

Nippon TimberCoat is a low-sheen, water-based acrylic paint that offers excellent durability and good adhesion, and contains light-fast pigments and an effective mould control additive. It is suitable to be used on exterior wood surfaces including fences, barge-boards, facias, exposed balconies, wood walls and cladding.

TIMBERLAC WOOD VARNISH

Bring the natural beauty of wood grains to life with Nippon Paint Timberlac, an interior decorative wood varnish that's perfect for new and old wooden furniture and door surfaces. Available in several attractive tints, this clear wood varnish adds colour while enhancing the natural grain of the wood, for spectacular results. It's also water resistant and formulated to prevent wood rot and mould growth.
