AUTOMOTIVE POLISHING COMPOUND

POLARSHINE A12

Polarshine A12 is used for easy and quick polishing, to permanently remove sanding marks, to compound swirl marks and to rapidly give a high gloss finish. It is designed to keep the surface temperature low when polishing. For removal of sanding marks Polarshine A12 is used on wool pads after sanding with P1200, on foam pads after sanding with P1500. Suitable for most paints and coatings. Silicone free.

POLARSHINE C20

Polarshine is a coarse polishing compound for removal of sanding scratches from P1200 and finer, for oxidized surfaces and for wash mark removal. It is also suitable for removal and leveling of fine orange peel structure. It is silicon free.

POLARSHINE F05

Polarshine F05 is a second step polishing compound to be used after Polarshine C20. F05 leaves a high gloss finish without swirl marks. It will remove compound swirls and fine sanding marks. F05 is a medium fine polish for cleaning and refreshing matt surfaces. It is silicon free.

POLARSHINE LWAX

Polarshine Lwax is a liquid wax designed for quick and easy sealing of polished surfaces. It provides a high gloss finish and protect the surface.

POLARSHINE M25

Polarshine M25 is a coarse compound for polishing of gel coat. It is suitable for polishing and removal of sanding marks from P800 and finer after sanding with Mirka's unique products Abranet, Abranet Soft, Royal Micro, Q. Silver Micro, Abralon and Waterproof. It is good for removal of sanding marks from P800 and finer.

POLARSHINE T10

Polarshine T10 is the ultimate single compound system. It is a medium coarse polishing compound especially designed for achieving the best result after sanding with Mirka's unique products. T10 removes sanding marks permanently after sanding with Abranet Soft P1500 and P2500 (alternatively Q.Silver, Royal Micro, Waterproof P1500 and finer). To speed up the polishing process after sanding with P1500, continue with Abralon P2000 and / or P4000 before polishing.
